An Australian Success:

A Boot Designed for Welders and Flame-Cutters

We are proud to introduce the **successful Australian Collie S3 welding boot** in Europe. Our welding and flame-cutter boot has been **specifically designed** to withstand the toughest welding and metal fabrication environments. For Australian welders, the Collie S3 has quickly become the **welding boot of choice** due to its durability, longevity, **safety and 100% Comfort**.

The Collie S3 is a 210mm men's high leg boot with an **industrial grade zipper**, ensuring quick-release so the boot can be removed with a single movement. **Fire retardant laces** are included at the top to ensure an extra snug fit. The durable Nitrile outsole has a heat resistance to 300°C and resists 200J drop force.

The **steel toe cap** makes this work boot a **popular choice for Rail Workers, Welders and Fabricators**.

Made from water-resistant **premium leather** in a classic Whiskey colourway, the **extra high leg** Collie S3 functions as a visual cue for safety compliance. The Collie S3, made from redwood leather, is stitched in a contrasting yellow strong **Kevlar® thread**.

All Steel Blue safety boots are CE certified and tested independently to major international safety standards.

Meets International Safety Standards

- ✓ European Standard EN ISO 20345
- ✓ American Standard ASTM F2413
- ✓ Australian Standard AS 2210.3
